LOCATION

OBA FORUM, 6TH FLOOR

Openbare bibliotheek Amsterdam

Oosterdokskade 143 (next to Amsterdam Central Station)

WHO?

Physicians, psychiatrists, psychologists,
nurse-specialists involved in HIV Care

Good mental health is a key component of health-related quality of life in persons living with HIV. 'HIV & Mental Health 2020' follows after the successful HIV and mental health conference organized in 2018.

During the 'HIV & Mental Health 2020' conference we will discuss the progress that has been made in the HIV mental health care path and the stepped care path that has been developed. Furthermore in this symposium, one important quality of life domain in HIV will be addressed: stigma.

After an interactive evening, recommendations will be defined on how to improve the integrated mental healthcare for persons living with HIV in the coming years.

We hope for a lively discussion and would like to cordially invite you to join this conference,

Kind regards,

DR. GUIDO VAN DEN BERK Infectious Disease Specialist, OLVG
(Conference Chair)

PROF. DR. ARJAN BOS Professor in Clinical Psychology, Open Universiteit
(Conference Chair)
